Our local **Southwest Riverside County FireSafe Council** was established by concerned citizens in 1998. Its mission is to help Southwest Riverside County residents become fire safe through public education programs offered quarterly. Relevant topics covered recently included fire safe home construction, proper vegetation thinning and maintenance around the home, fire insurance challenges, access issues for first responders and many others. The Council sponsors a successful brush collection and chipping program to encourage homeowners to dispose of flammable vegetation around their properties.

Plateau residents are encouraged to attend SRC FireSafe Council meetings held the third Monday of each month except July and December, at various locations. Get involved in helping our community become more fire safe. Visit the web site on the enclosed business card for more detailed information and links to the California FireSafe Council.
